

## **Technical Datasheet Barometer**

## **1353 Syrup Processor Barometer**

• Indicates the variation of the atmospheric pressure and boiling point of water to facilitate the production of maple syrup

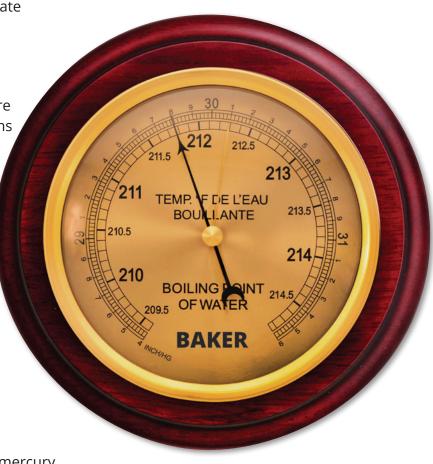

· Large, easy to read dial

• Set to read barometric pressure and boiling point of water

• Manual adjustment for atmospheric pressure

• Also helpful in forecasting weather conditions

during farm planting and harvest

## **Specifications**

Atmospheric Pressure Range: 29.4 to 31.6 of mercury

Temperature Range: 209.4 to 214.8°F

Dial size: 4"

Model	Description
1353	Syrup Processor Barometer
