

Single-Zone (SZ) High Precision Refrigerant Monitor

FEATURES

1 ppm Minimum Detectable Level	Detects leaks that other instruments can't Mitigate refrigerant loss, protect produce, enhance energy efficiency Select from a wide range of refrigerant calibration to meet project needs	
Early detection of refrigerant leaks		
Over 50 different refrigerants accurately detected		
Infrared sensor technology	Accurate, precise measurement unaffected by other gases, temperature or humidity	
High performance sampling pump	Fast response times, including extended sample lines	
Minimal maintenance and no calibration required	Low cost of ownership	
Halogen, CO_2 and NH_3 versions available	Suitable for a variety of refrigerant monitoring applications	

BENEFITS

The Most Effective Refrigerant Monitor in the Industry

DESCRIPTION

Bacharach's Single-Zone delivers the best refrigerant leak monitoring available, with industry-leading MDL of 1 ppm for halogenated gases, the fastest sampling frequency and the widest range of refrigerants accurately detected.

The Single-Zone is the ideal tool for early detection of leaks from specific target areas such as chiller rooms and mechanical rooms. The low MDL enables detection of leaks that other instruments can't find, enhances effective refrigerant management and delivers cost savings through reduced refrigerant recharge and enhanced energy efficiency. Communication interfaces are available allowing easy integration into BMS/BAS systems and remote monitoring solutions.

PRODUCT ATTRI	BUTES	DESCRIPTION
Sensor		Proprietary non-dispersive infrared (NDIR) technology
Display Resolution		1 ppm
Dimensions		13.7" x 7.7" x 3.6" (347.98 mm x 195.58 mm x 91.44 mm)
Weight		7 lbs (3.175 kg)
User Interface		Front panel w/3 indicator lights: Green - power on, normal; Yellow - fault; Yellow Flashing - system fault; Red Flashing - point has exceeded alarm set
Alarms		3 SPDT, 3 amp, 250 VAC rated alarm relays and 1 SPDT, 3 amp, 250 VAC rated system fault relay, plus a digital display with dedicated 4-20 mA DC analog output (floating ground)
System Noise		Less than 40dB at 10 ft (3m)
Response Time		9 to 90 seconds, depending on sample length tube
Sampling Mode		Automatic or manual (hold)
Re-Zero		Every 5 minutes or on 0.5 degree C internal temperature change
Monitoring Distance		1,200 ft max (500 ft for $\rm NH_3$) for combined length of sample and exhaust tubing (each zone)
Power Safety Mode		Fully automatic system reset. All programmed parameters retained
Operating Temperatu	re	32° to 122° F (0 to 50° C)
Ambient Humidity		5% to 90% RH non-condensing
Altitude Limit		6,562 ft (2,000 m)
Power		100 to 240 VAC, 50/60 Hz, 20 W
Approvals		UL 61010-1, CAS 22.2 No. 61010-1, EN 14624, CE Mark
