INDUSTRIAL IMAGING CLAMP METERS

FLIR CM174/275™

The FLIR CM174 and CM275 clamp meters combine thermal imaging with electrical measurement into powerful inspection, troubleshooting, and diagnostic tools. Through Infrared Guided Measurement (IGM™), they provide a fast, reliable way to identify hot spots and overloaded circuits from a safe distance. Confirm your findings with the clamp meters' wide range of functions plus temperature readings. The FLIR CM275 also provides wireless connectivity for direct connection to the FLIR InSite™ professional workflow management app. Whether you choose the FLIR CM174 or CM275 clamp meter, inspecting and servicing plant equipment and facilities will become safer and more efficient.

TROUBLESHOOT FASTER & SAFER

Identify electrical issues quickly with the power of IGM

- Scan entire targets for electrical issues with up to 160 x 120 thermal resolution
- Safely check for live connections using non-contact temperature measurement
- Pinpoint exact hot spot locations with laser or crosshairs
- Easily reach difficult, dark locations thanks to narrow jaw and built-in worklights

DIAGNOSE EFFICIENTLY

Quickly verify problems, check loads, and validate hot spots

- Diagnose complex systems with high and low voltage measurement capabilities
- Use advanced electrical features including VFD mode, True RMS, and LoZ
- Expand measurement capabilities to 3000 A AC with FLIR Flex Clamp accessories
- Rely on the protection of CAT IV-600V, CAT III-1000V safety ratings

DOCUMENT & SHARE RESULTS

Store data or share wirelesssly for improved workflow

- Store electrical measurements and thermal images internally, for later review*
- Wirelessly connect to FLIR Tools or FLIR InSite workflow management application for streamlined documentation and sharing*
- * FLIR CM275 model only.
