

FLIR VS290™

THERMAL VIDEOSCOPE KITS WITH SPECIALTY PROBE OPTIONS

The FLIR VS290 is an industrial thermal and visual videoscope system designed to help professionals quickly and safely find hidden dangers in difficult-to-access locations. Featuring a 160 × 120 true thermal imager and FLIR MSX® (Multi-Spectral Dynamic Imaging)*, the VS290 gives users the power to see and measure invisible hot spots before catastrophic equipment failures can occur. Early detection improves safety and reliability and helps lower maintenance and replacement costs.

The small, sleek tips of the 2 m and 1 m camera probes make it possible to easily inspect through tight or confined openings, improving productivity and reducing diagnostic time. The side-viewing probe options are CAT IV 600 V safety rated – perfect for underground electrical vault inspections. The forward-viewing probe option is a practical fit for general purpose equipment and building thermal scans. All are versatile tools for the most demanding environments in utility, manufacturing, and building maintenance applications.

INSPECT DIFFICULT-TO-ACCESS AREAS SAFELY

Quickly find hidden faults without entering unsafe or hard-to-reach spaces

- Troubleshoot problems from a safe distance with the 160 × 120 true thermal imager
- Easily maneuver the narrow 2 m or 1 m field-replaceable camera probe to inspect underground electrical distribution faults, inside large gearboxes, motors, attics, crawl spaces, and other cramped locations
- Instantly recognize the location of a temperature issue with FLIR MSX that embosses scene details from the built-in visual camera onto the full thermal image*
- Navigate dark environments using the bright LED worklight*

IDENTIFY, DOCUMENT, AND SHARE

Improve workflow and communicate potential issues before they become major problems

- View findings clearly on the large 3.5-inch color display and use color alarms (isotherms) to quickly identify problems
- Save images and videos using the included SD memory card then upload to a PC via USB-C Cable
- Quickly create reports using FLIR Thermal Studio Suite software and share findings with team members to prioritize repairs

VERSATILE, RUGGED, AND RELIABLE

Use the VS290 system in the most demanding environments

- IP67 camera tips and IP54 base unit and probe provide a high level of protection against dust and water
- Easily replace or interchange the camera probe while in the field
- Conduct electrical inspections safely with CAT IV 600 V-rated VSC-IR32 and VSC-IR33 probes
